1. A stake holder like parent need will not understand much about thrust areas being focused in the department.
2. One need not cater to societal needs to excel in their profession.
3. The term Artificial Intelligence is more apt in place of Cognitive Computing as it encompasses all.

Resolution:

1. The term 'thrust areas' has been retained as stakeholder is applicable to many more academically learned people.
2. The phrase 'to cater to societal needs' has been dropped.
3. The term 'Cognitive Computing Technologies' has been replaced with 'Artificial Intelligence Techniques'.

The meeting ended with a vote of thanks by the head of department.
