

## Academics

### **1. Subjects Taught**

#### **UG:**

Data Structures Using C  
C Programming  
C++  
Logic Design,  
Computer Concepts and C Programming  
Discrete Mathematics  
Analysis and Design of Algorithms  
Operating Systems  
System Software  
Unix System Programming  
Device Drivers for Linux OS  
Unix Internals  
Computer Networks/Data Communications  
Storage Area Networks  
File Structure  
Cloud Computing  
Information Security/Cryptography  
Blockchain  
Computer System Security

#### **PG:**

Cloud Computing  
Storage Area Networks  
Computer Networks  
Cryptography and  
Network Security

### **2. UG/PG Projects Guided**

Guided Many UG/PG Projects for their successful completion

### **3. PhD Guidance:**

Guiding 2 Students
